PROFESSIONAL OVERVIEW

Full-stack Software Engineer with 3+ years of professional experience delivering high-quality, cloud-native applications in Agile environments. Strong backend experience in C#/.NET with hands-on use of Python and JavaScript across RESTful services and distributed systems. Proven focus on code quality, automated testing, CI/CD, and DevOps practices, with the ability to collaborate across design, development, QA, deployment, and production support.

EDUCATION

- General Assembly Software-Engineering Bootcamp (Dec 2021)
- Multiverse Software Engineering Bootcamp Certificate (In Progress)

CORE SKILLS

- Languages: C# (.NET), Python, JavaScript/TypeScript, SQL
- Frameworks & Platforms: .NET Web API, Node.js/Express, Angular, React
- Architecture: REST APIs, microservices, event-driven patterns (foundational), cloud-native design
- Cloud & DevOps: AWS (S3, EC2 – hands-on; Lambda – working knowledge), Azure, Docker, CI/CD (GitHub Actions)
- Testing & Quality: Unit testing (xUnit/NUnit, Jest), automated regression testing, code reviews, static analysis
- Data: SQL Server, PostgreSQL, MongoDB
- Tools & Practices: Git/GitHub, Visual Studio, Postman, Linux/Bash (working knowledge), Agile/Scrum, SDLC automation

WORK EXPERIENCE

Software Engineer

HP Inc | 2025 – present

- Produced high-quality application code for enterprise platforms using .NET and Python, adhering to architecture standards and secure coding practices.
- Designed and implemented RESTful services and application modules supporting scalable, cloud-hosted workflows.
- Developed and automated unit tests to ensure coverage, regression protection, and system reliability.
- Contributed to CI/CD pipelines and containerized deployments (Docker), supporting repeatable builds and environment consistency.
- Actively resolved defects, refactored legacy components, and managed technical debt to improve maintainability and performance.
- Participated in Agile ceremonies (sprint planning, stand-ups, reviews, retrospectives) and collaborated across engineering, QA, and operations teams.
- Assisted with production support by troubleshooting issues, analyzing logs and service dependencies, and deploying fixes.

Software Engineer

General Assembly | Sep 2021 – Dec 2021

- Built full-stack applications using Python, JavaScript, Node.js, Express, and React in Agile teams.
- Designed REST APIs and backend services with PostgreSQL and MongoDB, applying modern development fundamentals.
- Practiced test-driven development principles, version control, and collaborative code reviews.

Credit Controller

S3 | Jan 2023 – Dec 2024

- Automated reporting and reconciliation workflows using advanced Excel techniques, improving accuracy and operational efficiency.
- Strengthened analytical thinking, attention to detail, and cross-functional communication in a data-driven environment.

PROJECTS

Pixel Forge - Implemented Dockerized front-end and back-end services with CI/CD automation, secure authentication, and environment-based configuration.

DrivingEd - Developed a full-stack .NET and SQL Server scheduling platform with validated workflows, REST APIs, and deployment-ready configuration.

Inventory Application - Built a React UI integrated with a RESTful Express API and relational data storage, emphasizing maintainability and clean data flow.
